About This Game

What is it?

Campfire is a multiplayer lie and deceit game. You got to bluff, accuse and persuade others via voice chat.

Cool, what else?

It is similar to a "Mafia Party Game", with a different scenario: You are out camping with strangers.

You have to survive in the woods together. But not everyone is what they seem. There is a Killer among you and, one by one, he will try to kill everyone and sabotage the camp. Are you a capable to find the killer, before everyone is dead or run out of resources?

You all are in the camp, but you need food, water and fire to stay alive. It is a harsh weather, but working together you can strive. While in the camp, use the voice chat to coordinate the group. Every camping round, you all can vote to execute a suspected Killer or get back to gathering. Careful not to execute innocents, it will be one less for the killer take care of. When

gathering resources, you are all by yourself... or aren't you?

What to do?

If you are a Camper, gather resources and take care of each other. Discuss and Vote to execute a Killer suspect.

If you are a Killer, attend the call. Stalk the others, and kill them. But be careful, someone may be watching you.

If you are a Protector, choose a person to protect for the round. You can make sure someone will be safe this turn. But will you use it to help others, or to grant your own selfish survival?

How to play?

The game is based on communication and logic. Speak with others and observe their intentions via their vocal expression. If the killer kills everyone, he wins. Else, the Campers are the winners. If the camp run out of resources, everyone loses.
