The game looked promising in the beginning and it does have potential, however the last update was back in mid 2017. Almost positive the developer has given up on it. Do not invest in this game. Also better versions of this game out on steam now.. This is Marble Blast Ultra for a modern era. It definitely needs to see some refinement, but I see a lot of potential here. Besides, I've been looking for Marble Blast on PC so I'm happy with it. At the price point, I would recommend it.
